

GLOBAL 
 **CAPACITY** 
 **BUILDING** 
 **COALITION**

Building Capacity. Unlocking Capital.

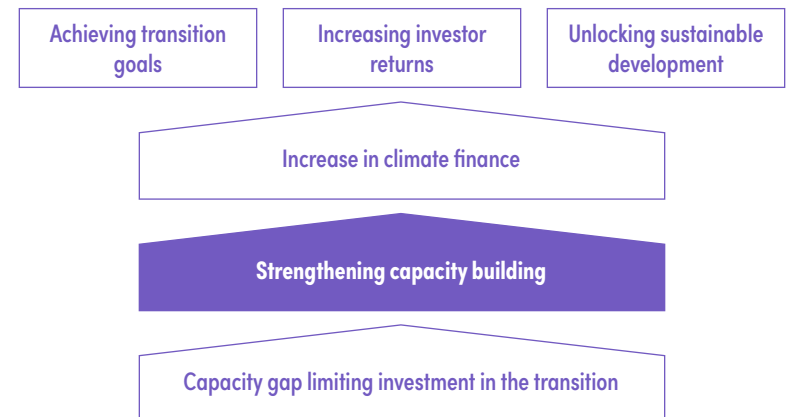

▶ The Global Capacity Building Coalition (GCBC) is an unprecedented global initiative.

It brings together many of the world's leading climate finance organisations to accelerate and scale capacity building for financial institutions and finance professionals, particularly in emerging markets and developing economies (EMDEs).

Capacity-building itself is not the ultimate objective, but the means to an important end goal. The GCBC ultimately aims to mobilise climate finance globally, and to accelerate the transition to sustainable economies.

The GCBC will catalyse and convene global, regional, and national capacity-building ecosystems, bringing together financial institutions, policymakers and regulators, multilateral organisations, professional bodies, trade associations, universities and business schools, climate NGOs, and others to accelerate learning and scale climate finance.

GCBC Theory of Change

Join Us

We are interested to hear from multilateral organisations, professional bodies, trade associations, universities and business schools, climate NGOs, philanthropies, development organisations, and others active in climate finance capacity-building.

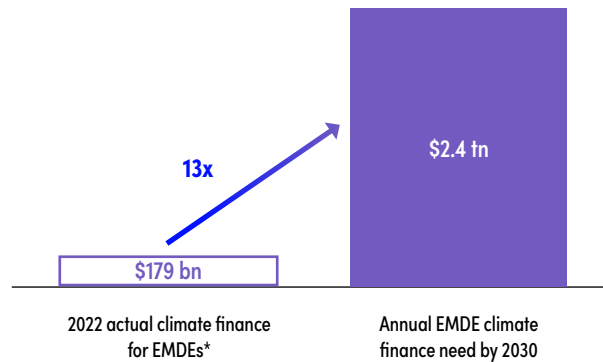

To express interest in joining the Global Capacity Building Coalition, or supporting our work in other ways, please contact us at: secretariat@capacity-building.org.

▶ The Case for Capacity Building

Accelerating and scaling climate finance is urgently needed to meet transition targets, especially in EMDEs.

- Climate investment in EMDEs will require \$2.4 trillion per annum by 2030.

Required increase in annual climate finance for EMDEs

- Domestic financial institutions in EMDEs will be critical financiers and intermediaries. Yet for many, the path to mobilising capital for the climate transition is unclear and costly, and the business case for action not well understood. Further, best practices are still emerging and developing. Capacity building can help address these challenges through strengthening knowledge and expertise, clarifying incentives, and providing support for new projects.
- Unlocking capital for climate finance in EMDEs will build resilient, sustainable economies and support the climate transition globally.

Capacity Building plays a key role in accelerating and scaling climate finance in EMDEs

- Private sector financial institutions in EMDEs have identified a critical need for capacity-building, technical assistance, education, and training to mobilise finance for the climate transition.
- There are many high-quality capacity-building programmes and resources available. The current offering is fragmented and difficult to navigate, however. A 2024 GCBC survey found 75% of financial institutions in EMDEs faced issues accessing relevant resources.
- The GCBC's Digital Platform (**capacity-building.org**) will be a global hub for climate finance capacity-building and technical assistance resources, case studies, and live learning opportunities.
- By bringing together many of the world's leading capacity-building organisations, the GCBC will simplify the landscape for financial institutions, finance professionals, and others, and significantly increase the availability and effectiveness of climate finance capacity-building programmes.

The GCBC Platform offers 5 pillars of functionality to support users in their learning journey

Knowledge Hub

Knowledge Hub will consolidate high-quality educational climate finance resources from leading organisation into one easy-to-use platform.

Case Study Map & Library

Case Study Map & Library will provide real-world examples of best-practices in climate finance projects, showing how capital can be mobilised and deployed for maximum impact.

Live Events

Live Events will list upcoming learning events relevant to climate finance, hosted by a range of organisations, on a centralised calendar.

Interactive Feedback

Interactive Feedback will allow users to provide real-time feedback on existing resources and functions, enabling continuous platform improvements.

Translation & Enabling Features

Enabling Features will maximise user numbers and geographic reach through automatic translation capabilities and search optimisation.

*Excluding China

► Bringing together world leaders

By bringing together some of the world's leading capacity-building organisations, the GCBC will simplify the landscape for financial institutions, finance professionals, and others, and significantly increase the availability and effectiveness of climate finance capacity-building programmes.
